ABOUT

I have graduated from the Faculty of Technology for 2 years and have gained experience in web development. During my year at NiNa Web Design Company, I became proficient in technologies such as HTML, CSS, JavaScript, PHP, and database management, which allowed me to build a strong foundation in designing and developing web applications.

Continuing my career journey, I had the opportunity to work at Fastcoding for six months, where I became familiar with and applied PUG, SASS, SCSS, and various JavaScript techniques. These experiences have expanded my knowledge and enhanced my ability to work with modern tools and technologies.

With a combination of comprehensive technical skills and diverse practical experience, I am confident in my ability to make a positive contribution to the company's development. I am always eager to learn and work diligently to achieve excellent results.
